A Jax customer has many advantages, as you'll see by the contents of this brochure and our web site. In addition, we will always do what it takes to make our customers happy.

THE JAX WASHING PROCESS

At all Jax Kar Wash locations, we use only soft cloth, high-pressure water and mild soaps to clean your vehicle. We do not use any brushes or harsh chemicals which can be harmful. To find out more about the safety of car washing visit our "Safety of Professional Car Washing" page on our web site.

Our computer controlled wash line safely takes your car through several processes; the first step is the presoak, a cleaning solution to loosen the dirt and lift it away from the paint. Then a foamy soap is applied for improved cleaning and lubrication.

Next is the soft cloth and high-pressure water to remove the dirt and film and shine the finish.

If any waxes or undersealant are ordered, they are applied at this stage.

Finalizing the process is a finishing rinse to aid in the drying process, followed by the air blowers.
